```java
package p1;

/**
 *
 * @author Admin
 */
public class frist {

    public void show()
    {
        System.out.println("This is First Class");
    }
}
//
package p2;

/**
 *
 * @author Admin
 */
public class second {
    public void disp()
    {
        System.out.println("This is second class");
    }

}
//
package p3;
import p1.frist;
import p2.second;
```

```java
/**
 *
 * @author Admin
 */
public class third {
    public static void main(String[]args)
    {
        frist i=new frist();
        second j =new second();
        i.show();
        j.disp();
    }

}
```
